

Our Special Inspections program offers a one-time approval for Electrical & Fuel Burning products that are required to meet Canadian standards. The LC Special Inspection label proves to inspectors that your equipment has met Canadian requirements. Approved products will be labelled onsite.

LabTest is recognized by the Authorities Having Jurisdiction (AHJ's) across Canada.

CSA SPE-1000 for Canada (General Electrical Products)

CSA SPE-3000 for Canada (Medical Electrical Equipment and Systems)

CSA B149.3 for Canada (Fuel-Related Appliances)

LabTest offers NEXT DAY, cost-effective services anywhere in Canada!

When to Book a Special Inspection?

- If you need fast turnaround times
- If certification is not practical
- If your product has already been shipped and/or installed
- To confirm if the product is ready for certification
- If you are modifying already certified products
- If your products have been “Red Tagged”
- If you have limited quantities or batches
- If you are testing the market and may not continue production

Fixed annual competitive pricing available for high volume customers
