

LabTest “Special Inspections” program offers a one-time approval for Electrical/Electronic products manufactured in limited quantities or batches that are required to meet Canadian standards. The evaluation consists of an inspection of the product, its components, and drawings, onsite or at the lab, by a LabTest qualified inspector. The equipment is then labeled with the “LC Special Inspections” label and it can be sold in Canada.

LabTest is recognized by the Authorities Having Jurisdiction (AHJ's) across Canada.

CSA SPE-1000 for Canada (General Electrical Products)

CSA SPE-3000 for Canada (Medical Electrical Equipment and Systems)

When to Book a Special Inspection?

- ▶ If you need fast turnaround times
- ▶ If certification is not practical
- ▶ If your product has already been shipped and/or installed
- ▶ To confirm if the product is ready for certification
- ▶ If you are modifying already certified products
- ▶ If your products have been “Red Tagged”
- ▶ If you have limited quantities or batches
- ▶ If you are testing the market and may not continue production

Products Within SPE-1000 Scope:

- ▶ Luminaires
- ▶ Industrial control panels
- ▶ Generators
- ▶ Solar systems
- ▶ Switchboards
- ▶ Robotics
- ▶ Heating and cooling
- ▶ And more

Fixed annual competitive pricing available for high volume customers
